Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk without suitable training. Fire fighters should wear appropriate protective equipment and self contained breathing apparatus with a full face piece operated in positive pressure mode. Move undamaged containers from immediate hazard area if it can be done safely.

Other information : Prevent entry to sewers and public waters.

6.1.	Personal precautions, protec				
6.1.1.	Spill Procedure :	Clean up personnel must wear protective equipment to prevent contact with the product. Evacuate the area of all unnecessary personnel. Stop spill at source. Use inert absorbent material such as sand, clay, earth or floor absorbent to clean up spill. Shovel into drums.			
6.1.2. Personal Precautions, : protective equipment and emergency procedures		Ensure adequate ventilation. Wear personal protection equipment. Remove persons to safety. Do not breathe vapors or spray mist.			
6.2	Methods and material for : containment and cleaning up	Suitable material for taking up: Absorb spill with inert material (e.g. dr sand or earth), then place in a chemical waste container. Wash with plenty of water.			
6.3	Environmental precautions:	Prevent entry to sewers and public waters.

8.1.	Appropriate engineering controls	:	Use ventilation adequate to keep exposures (airborne levels of controls dust, fume, vapor, etc) below recommended exposure limits. Handle in accordance with good industrial hygiene and safety practice. Avoid contact with skin, eyes, and clothing. Do not breathe dust/fume/gas/mist/vapors.
8.3.	Individual protection Measures Eye Protection	:	When directly handling liquid product, eye protection is required, such as chemical safety goggles or chemical safety goggles in combination with a full-face shield when there is a greater risk of splash.
8.4.	Hand protection	:	Impervious gloves e.g. PVC, nitrile rubber, butyl rubber
8.5	Skin and body protection	:	Long sleeved protective clothing. Chemical resistant apron
8.6.	Respiratory protection	:	Spraying increases the risk of hazardous exposure. In atmospheres where the material is sprayed, workers should avoid contact with aerosols through proper engineering controls such as exhaust ventilation and proper protective equipment such as a full face air supplied respirators. NIOSH/ MSHA approved air purifying respirator should be used if operating conditions produce airborne concentrations that exceed exposure limits for any individual components.
8.7.	Hygiene Measures	:	Wash hands, forearms and face thoroughly after handling chemical products.
8.8.	Personal Protective Equipment(PPE)	:	Protective goggles. Gloves. Protective clothing. Insufficient ventilation: wear respiratory protection.
